

December 6, 2023

To whom it may concern,

The Camp Quality USA Medical Committee recommended we drop the Covid Vaccination requirement for campers, family members, volunteers and staff but keep the same exclusion requirements for people with viral illness or respiratory symptoms. This is effective immediately.

A few important things to note:

- The Covid Vaccination will still be strongly encouraged/recommended.
- We will continue to conduct arrival and daily health checks at camp.
- We will screen for viral and respiratory illness camp.
- The screening tool will be used for family camps and day camps, and a Camp Check-In form (with viral illness screening questions added) will be used for week-long camps.
- Hand sanitizing and pods/cohorts at camp will be highly recommended.
- **THIS IS SUBJECT TO CHANGE.** We will continue to monitor the situation. As you know, the Covid virus has been a rollercoaster so there may be a change.

Sincerely,

Laura Vaughn, CEO
